2022 TRENDS

Our Frictionless Future

Noor Naseer

VP, Media Innovations + Technology

Kaitlin O'Brien

Media Innovations + Technology Manager

Moments of Friction Interrupt the Consumer Journey

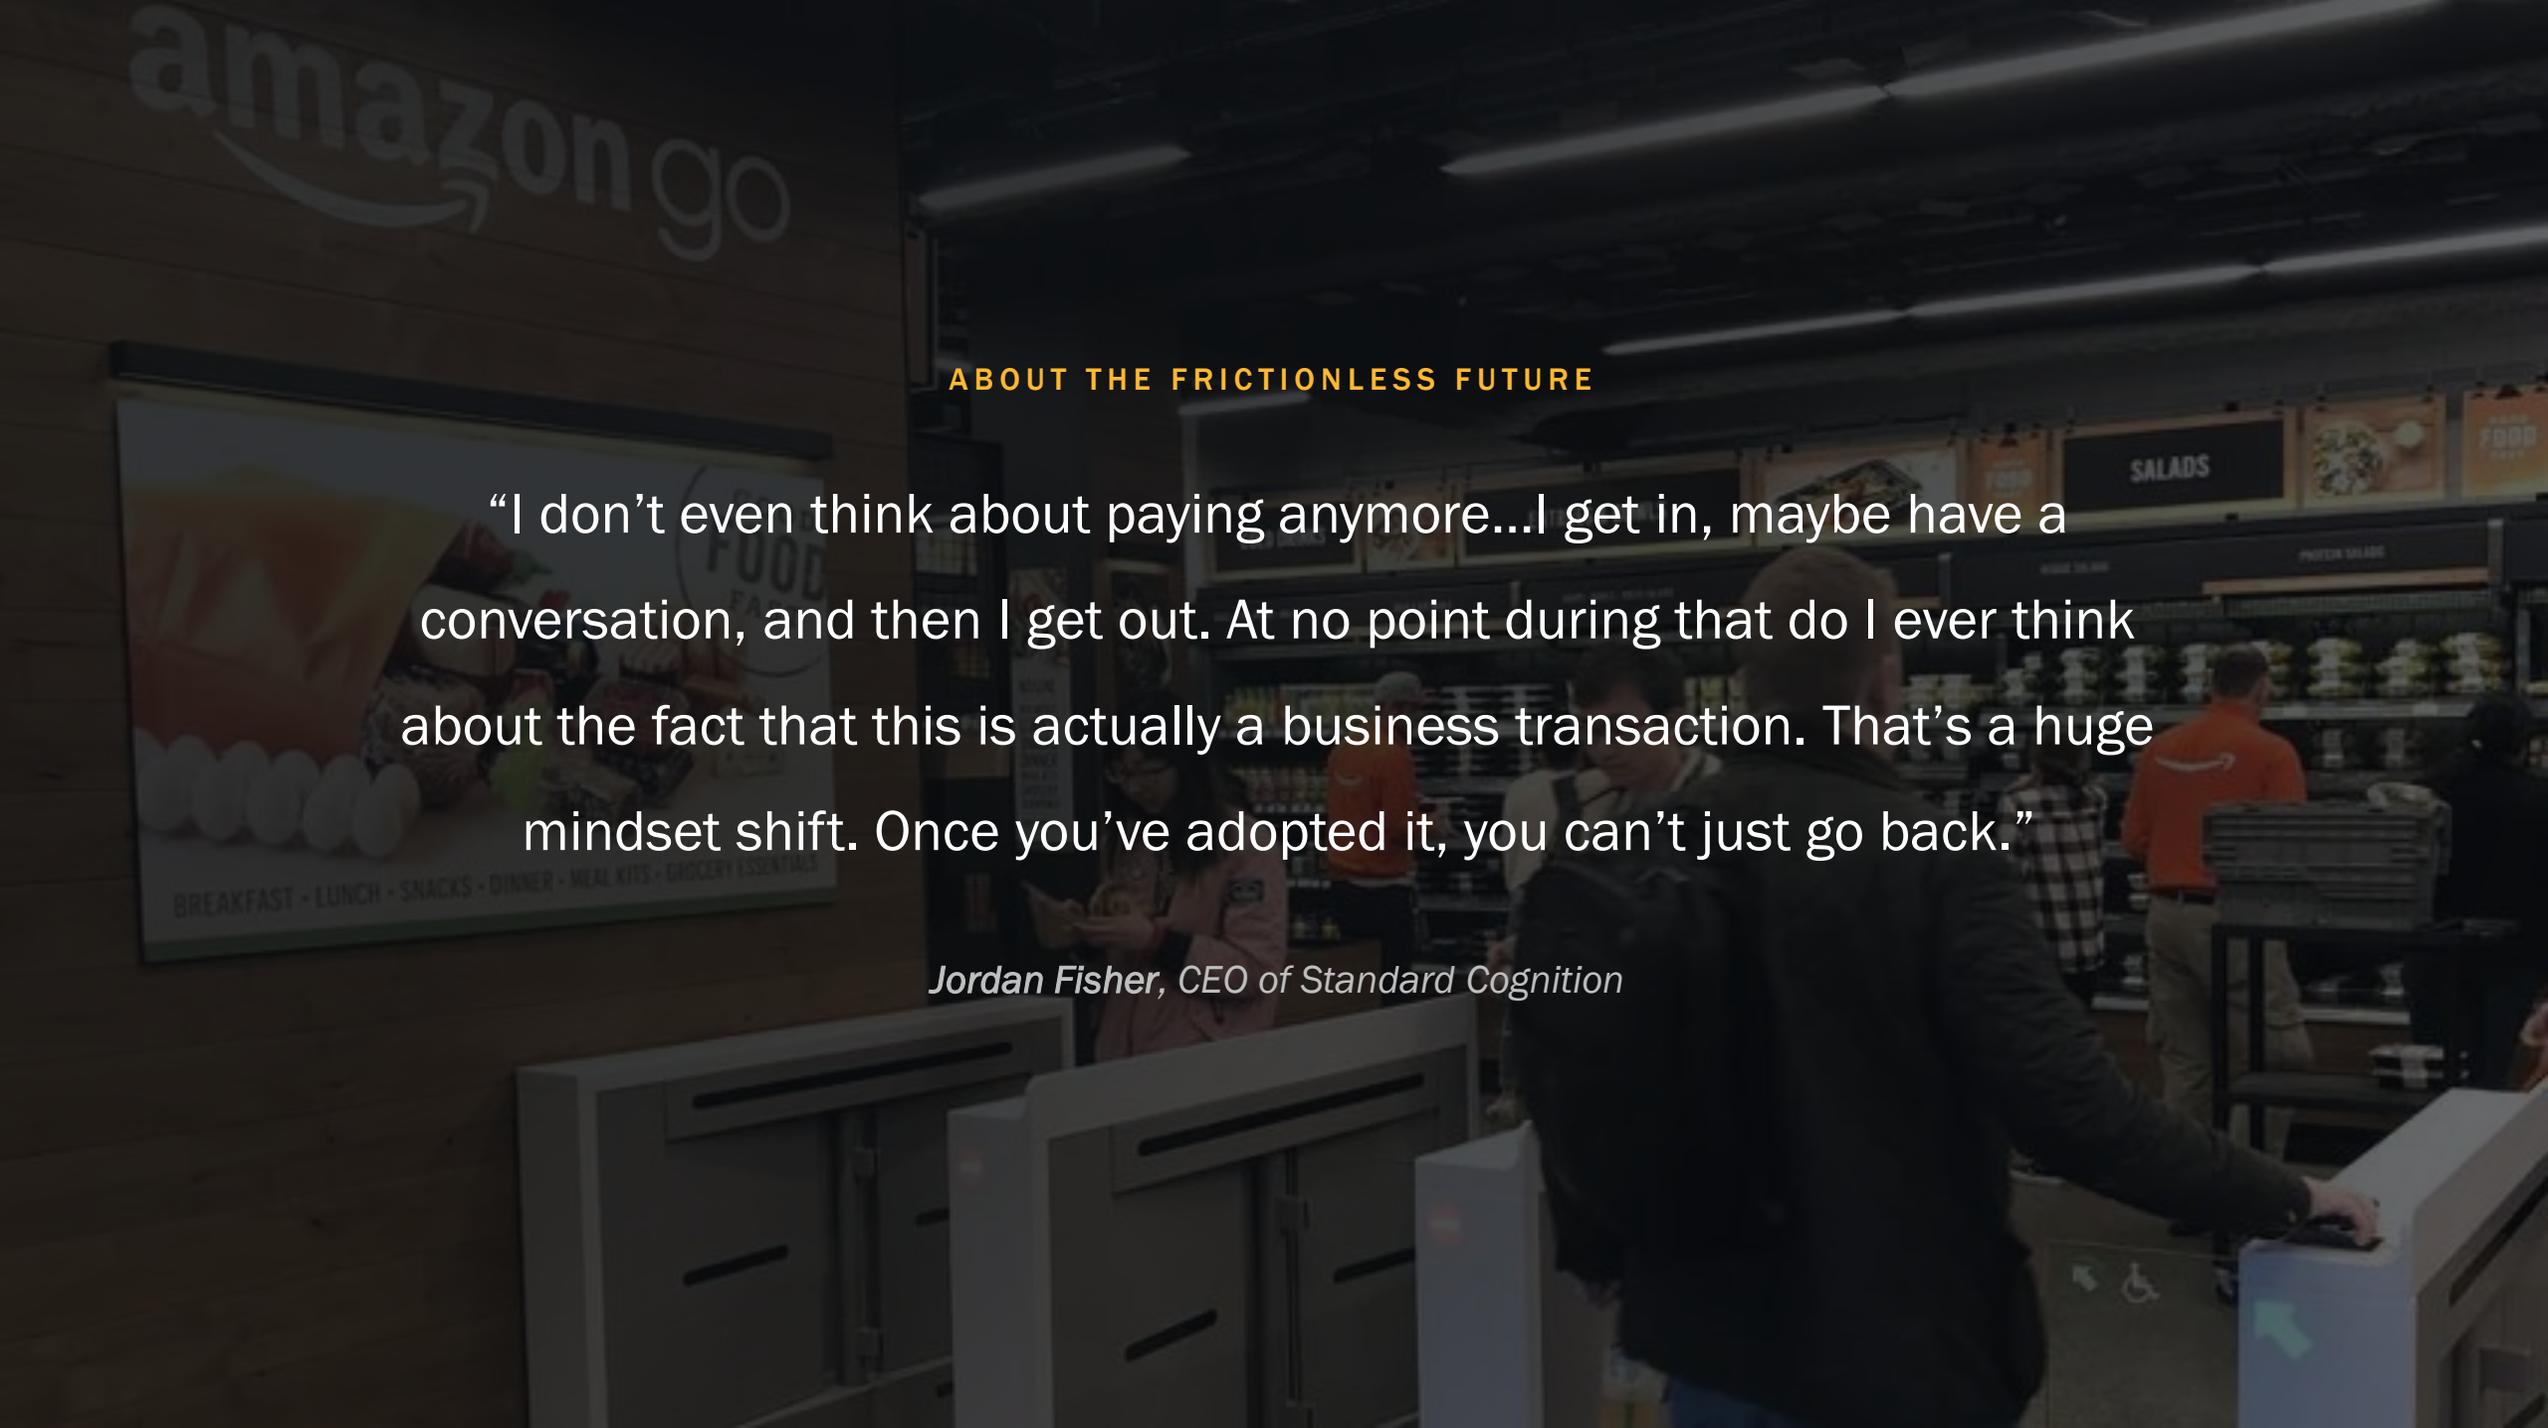

MORE FRICTION

LESS FRICTION

Friction interrupts or creates disconnect within an experience, requiring additional time and effort

The background image shows the interior of an Amazon Go store. The "amazon go" logo is visible in the top left corner. A sign on the left wall lists food categories: "BREAKFAST - LUNCH - SNACKS - DINNER - MEAL KITS - BAKERY - BEVERAGES". In the center, a man in a dark jacket is walking through a turnstile. In the background, there are shelves stocked with goods, a sign for "SALADS", and a person in an orange Amazon uniform. The overall scene is dimly lit, with the text overlaid in white and orange.

ABOUT THE FRICTIONLESS FUTURE

“I don’t even think about paying anymore...I get in, maybe have a conversation, and then I get out. At no point during that do I ever think about the fact that this is actually a business transaction. That’s a huge mindset shift. Once you’ve adopted it, you can’t just go back.”

Jordan Fisher, CEO of Standard Cognition

Cookieless Purgatory

OUR FRICTIONLESS FUTURE

COOKIELESS PURGATORY

More answers, more problems

COOKIELESS PURGATORY

Why are we in Purgatory?

BIG TECH FLUX

Big Tech is playing offense and defense to legislative regulation and address consumer privacy concerns

LEGISLATIVE LOGISTICS

Continual introduction of legislature requires compliance, including interpretation + implementation of laws

COOKIELESS SOLUTIONS

Marketers must distinguish which cookieless “solutions” are smoke and mirrors and which are viable, long-term, privacy compliant options

Solutions on the Horizon

IDENTIFICATION SOURCES

1

BROWSER

Groups users into relevant cohorts based on **browsing activity**

2

ADDRESSABLE

Matches various user consented data points to an anonymized, but dynamic ID, creating **identity resolution**

3

AUTHENTICATED

A **static identification point** (i.e. email), anonymized and associated to a user

4

DATA PLATFORMS

Organizes large, hard to manage data sets for greater **insights and audience targeting**

Cookieless Solutions on the Horizon

VENDOR METHODOLOGIES

BROWSER

FLoC clusters users into interest-based cohorts using browsing behaviors while obscuring user identity and remain privacy compliant.

ADDRESSABLE

Connects several consumer data points to RampID identifiers to improve attribution across offline actions, online exposures, and first-party and third-party data.

AUTHENTICATED

UID 2.0 uses email and a single sign-on mechanism to gather and authenticate users across various publishers.

BIG DATA – CDPs

Ingests, unifies, and stores disparate data sources.

CDPs have begun to integrate with cookieless solutions vendors (eg; LiveRamp and UID2.0) for activation

Checkpoints for Cookieless Solutions

An Introduction to Decentralized Finance (DeFi)

Decentralized Finance: a system by which financial products become available on a public **decentralized network**, eliminating middlemen like banks or brokerages. DeFi provides **data security, financial opportunity, and process automation.**

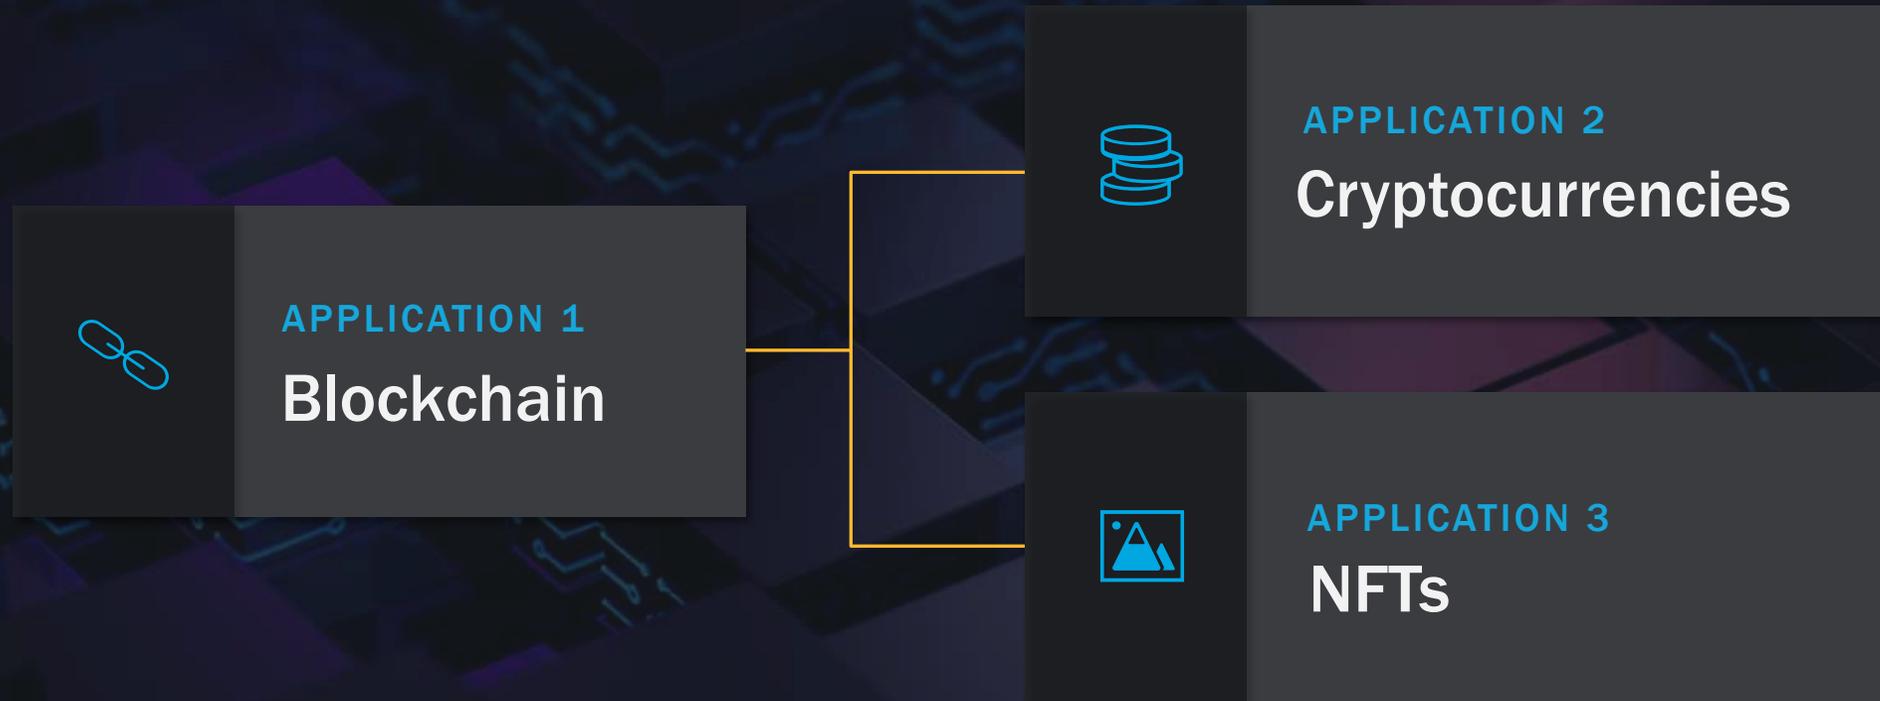

73%

of Financial Services Executives believe they will **lose competitive advantage** by not adopting Blockchain technology

80%

of Financial Services Executives anticipate **new revenue streams** from Blockchain and Cryptocurrency Solutions

DeFi: An Integrated System

Understanding Blockchain

Blockchain:

a digital record of information, using peer-to-peer computer networks to validate and add information to the chain.

BENEFITS OF THE BLOCKCHAIN

AUTOMATION

Decentralization creates fluidity
Smart Contracts reduce friction

AUTHENTICATION

Validation ensures accuracy
Raw data is transparent

SECURITY

Data is encrypted
Records are tamper-proof

Blockchain in the Advertising World

IMPROVED CONSUMER PRIVACY

Users are empowered to have ownership of their data

AD FRAUD MITIGATION

Transparency in supply chain eliminates bad actors

AUTOMATION

Machine Learning/AI and Smart Contracts enable efficiency

Understanding Cryptocurrencies

Cryptocurrency:

a digital, non-fiat currency that's underpinned by Blockchain technology

CRYPTOCURRENCIES OFFER

ACCESSIBILITY

EFFICIENCY

COST SAVINGS

CNN BUSINESS

LIVE TV

Jamie Dimon hated bitcoin. Now JPMorgan is getting ahead of the crypto revolution

18% of the US adult population (46MM consumers) reported they plan to use cryptocurrency to make a purchase this year

Cryptocurrencies in the Advertising World

Enabling cryptocurrency payment options can drive increased brand revenue

DeFi is producing a new client category and advertising opportunities to support

Digital transactions can reduce room for error in media buying and billing reconciliation

Understanding NFTs

NFT: non-fungible token – a unique digital asset that contains value and represents ownership

Fungible: assets hold the same value, regardless of attributes (think: state quarters)

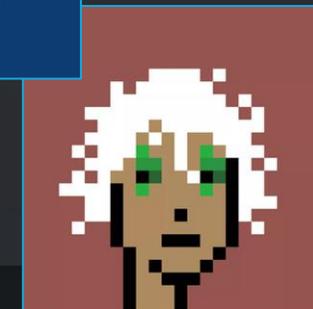

Non-Fungible: unique attributes of an asset determine its value (think: Mona Lisa)

**NFTS EXHIBIT CLASSIC
COLLECTIBLES MENTALITIES**

Loyalty Programs

DEFINING DEFI

Takeaways

DeFi is evolving industries and job roles, creating **new markets** to tap into

DeFi will continue to experience **legal, logistical,** and **regulatory hurdles** to navigate

Blockchain technology fills gaps in security, transparency, authentication, and automation our current systems lack

While remaining speculative, **cryptocurrency** is a booming financial industry

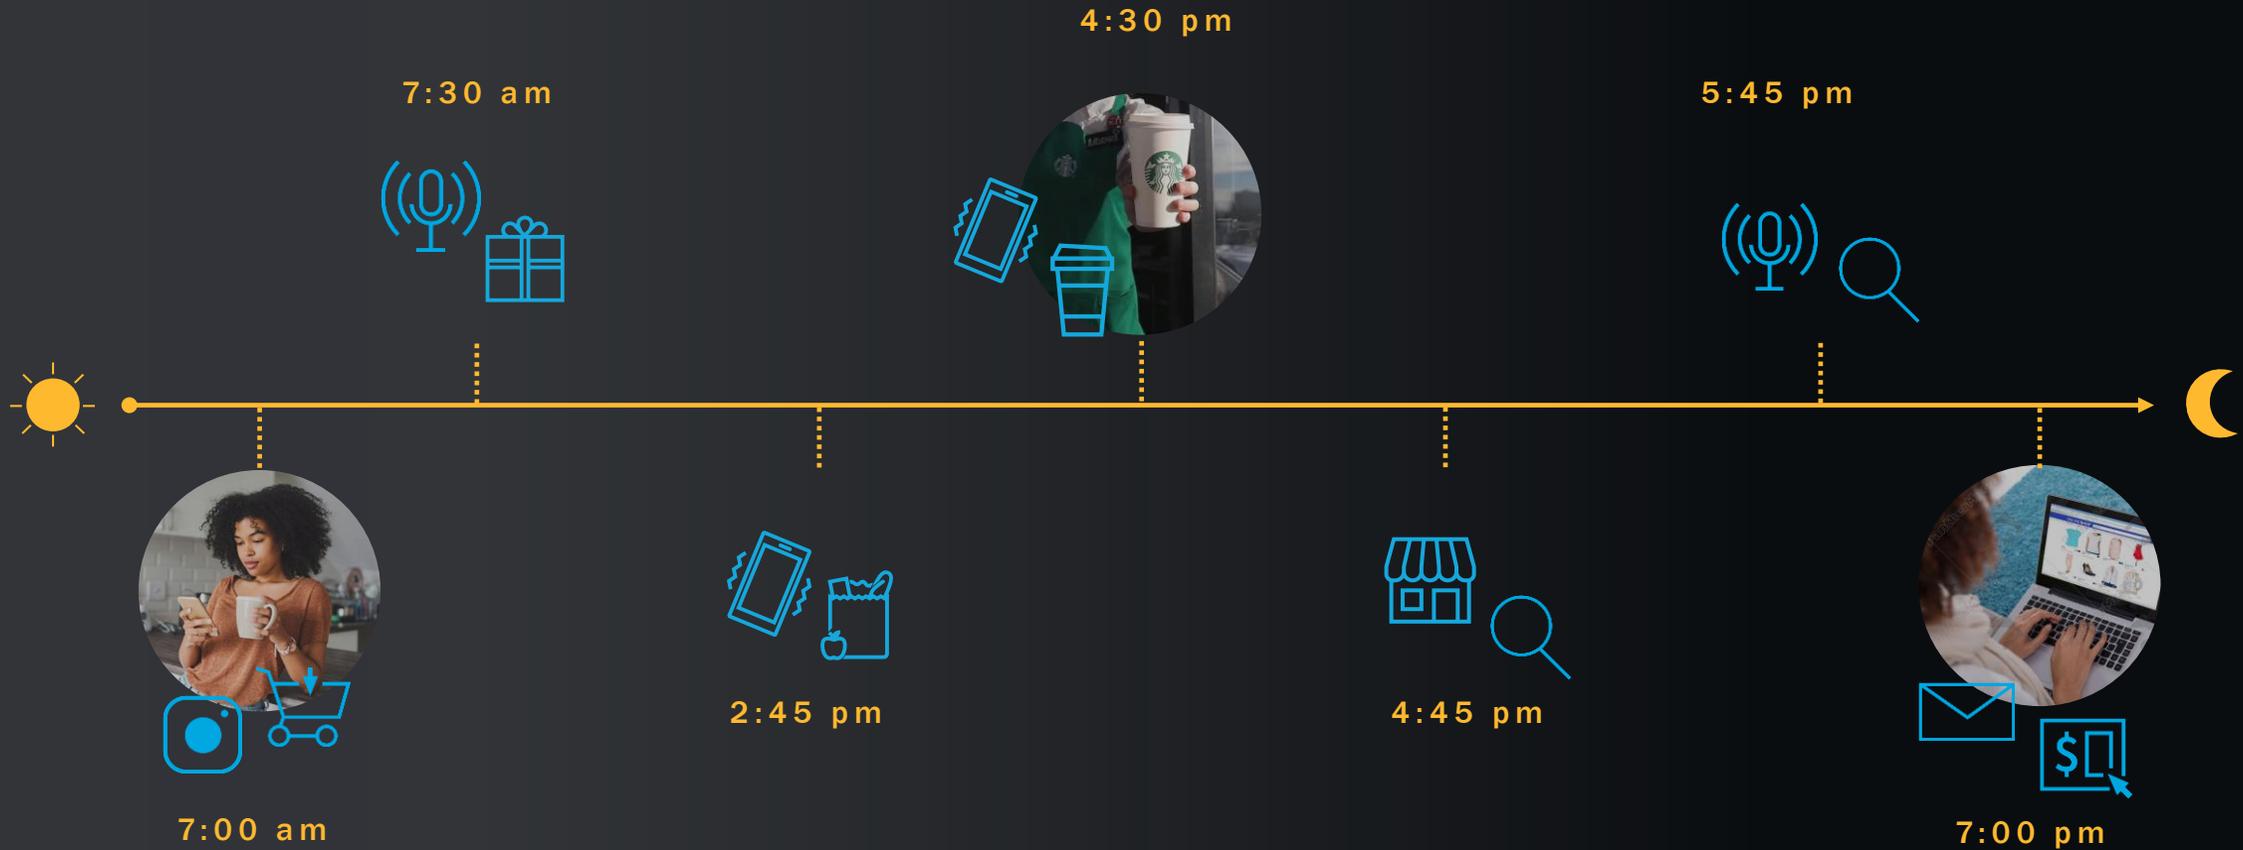

NFTs offer both **novelty** and **utility**, creating tremendous opportunity for brands and advertisers

A futuristic car design studio with a wireframe car model and people working on tablets. The scene is dimly lit, with a focus on the glowing wireframe car and the people interacting with digital devices. The car is a sleek, modern sedan, and the wireframe is composed of orange and blue lines. The people are dressed in professional attire, and the background shows server racks and a clean, modern interior.

Hybrid Reality 2.0

OUR FRICTIONLESS FUTURE

The existing hybrid consumer journey

Hybrid Reality Attributes

WHAT CONSUMERS VALUE

CONVENIENCE

Consumers want to purchase when, where, and how they want

PERSONALIZATION

Gen Z, Millennials expect personalization from brands they engage with

CONSISTENCY

Consumers expect consistency across channels

ANTICIPATED NEEDS

Users were more likely to purchase from a brand that showed them relevant product recommendations

DATA

is the underlying support system for these attributes and is key in creating successful hybrid realities

Common Activations to Reduce Friction

6 WAYS TO FACILITATE HYBRID REALITIES

CONTENT AS COMMERCE

Brands are reimagining how commerce opportunities are integrated into content and corresponding delivery channels

TRY BEFORE YOU BUY

Consumers are now used to a variety of options and combinations for how they'll purchase, pay, and receive items

SELECT AND COLLECT

Virtual and remote services have offered greater independence to consumers – they can shop when, where, and how

VIRTUAL ACCESSIBILITY

Incorporating mixed reality elements (AR, VR) into purchase decisions increases potential for conversion

APP ENABLEMENT

Mobile apps are being leveraged more as an all-access pass, housing more information and features to ease the consumer journey

IRL EXPERIENCES

Real life experiences are still highly valuable to consumer brand affinity, engagement, and purchase consideration

DELIVERING CUSTOMER EXPERIENCE

While uncertainty continues to cloud vision, brands that **pay attention to people's experience**, and use that insight to inform the way they speak and act, can find the right tone to foster moments of genuine connection.

In some cases...the tone of voice you find...can characterize your brand for years to come.

— Lessons For Today's Brands From The 2008 Recession, CEO Today
